

Client

```
ITarget target =  
    new Adapter(  
        new Adaptere()  
    );
```

```
target.request()
```

```
class Adaptere {  
    public void specificRequest();  
}
```

```
interface ITarget {  
    void request();  
}
```

```
class Adapter : ITarget {  
    Adaptere adaptere;  
    public Adapter (Adaptere a) {  
        this.adapter = a;  
    }
```

```
    public void request() {  
        this.adapter.specificRequest();  
    }  
}
```
